

THE DISCOVERY MISSION

The Discovery mission puts NASA back in business! In the words of the launch manager this morning, “beginning America’s new journey to the Moon, Mars and beyond.”

July 27, 2005 — The Palatine Group today launches another successful e-learning course for project managers: Return to Mars: Leading a Complex Project, based on NASA’s historic Pathfinder mission to Mars. Originally developed for NASA’s Project Management Academy, current external users include Qwest, Rockwell, Alcoa, Fujitsu, Cisco, Honeywell, Oracle, IBM, Pfizer, Nokia OJ, SAP, Duane Reade, Citigroup, JP Morgan Chase, Honeywell, HSBC and Occidental. The 10 hour courseware is available online from The Palatine Group.

A new chapter in Space Exploration

July 4, 1997. The rover Sojourner lands on Mars, opening a new chapter in the exploration of the universe. "This is a big night for us," says NASA head, Dan Goldin. “We’re back!”

A triumph not only for science, but for project management. Sojourner’s landing on the Red Planet was the result of better teamwork, training, and innovative project management. Now you can participate in NASA’s first interactive online course, recreated from the historic Pathfinder mission and collaborate with the historic team of engineers and project managers.

A new chapter in Project Management

July 27, 2005. Return to Mars is an interactive multimedia course that dramatically captures NASA’s successful mission to land the first

autonomous ground vehicle on another planet. RTM blends documentary video footage, new interviews, animation, interface facility—and even Leonard Nimoy—into fourteen 30-minute episodes, boasting some 40 movies, and over 350 screens.

- Achieve critical enterprise objectives
- Maximize job performance
- Reach new heights

Return to Mars—A dramatic context in which to teach effective project management techniques.

Based in New York, The Palatine Group specializes in interactive simulations, e-learning, and performance support.
